

SAR BOAT ERTZAINZA

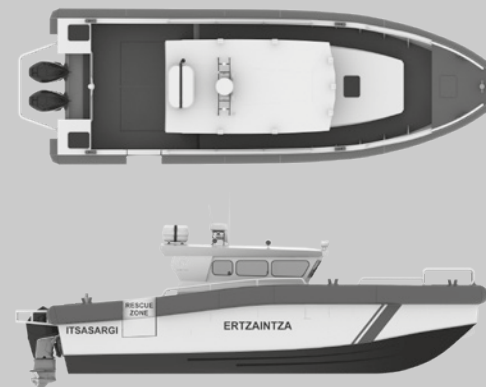

This 11 meters “Search&Rescue” boat is specifically designed for ERTZAINITZA (Spanish Police) to do the most exigent work in heavy seas, within highest safety conditions for the crew. The main deck has been designed with an available free area over 9m² with easy sea access for rescue and diving purposes.

The maximum 34kn speed at full load is achieved thanks to the propulsion system equipped by two outboard MERCURY engines of 300hp each. The range of this particular boat is over the average range of this type of boats thanks to the twin fuel tanks of 600 litres each.

The crew formed by 9 pax is fully protected within the nordic vision 360° cabin and accommodated thought dumping seats for an easily and comfortable sealing in rouge seas. Thanks to the well design and interior space requirements, the boat has an interior double deck cabin where the forward cabin deck permits the arrangement of extra seats and a dinette, besides to increment the stowage capacity.

Main particulars

Length overall: 10.70m

Length between perpendiculars: 9.72m

Beam: 3.50m

Height: 2.00m

Design draught: 0.60m

Scantling draught: 0.70m

Displacement (Td): 8203kg

Design category (CE): Zone 3 | Cat. C

Block coefficient: 0.392

Max. power: 2x 350hp

Max. speed: 34kn

Cruise speed: 24kn @ 80% MCR
